

Pwr Dist. Schem #1

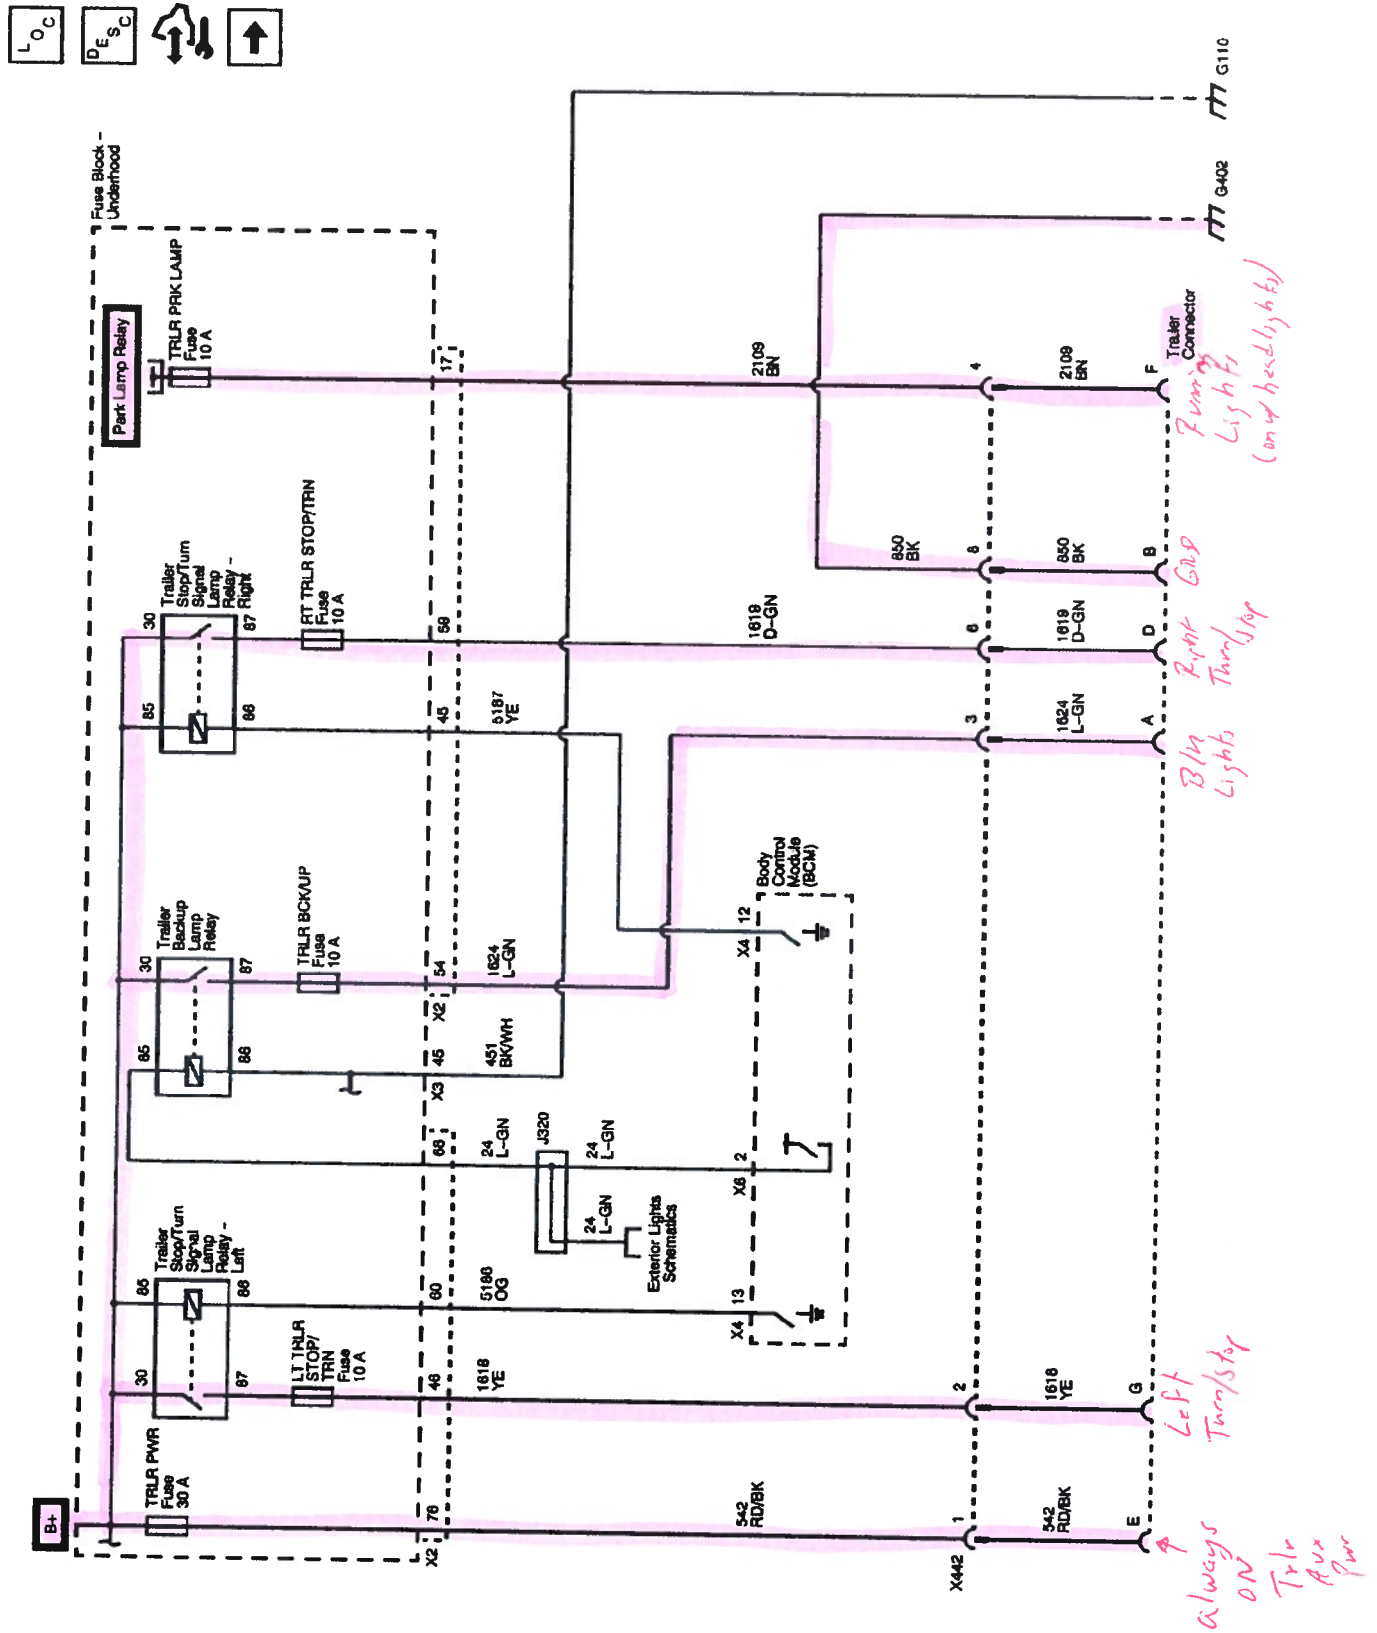

The diagram illustrates the wiring from a central fuse block under the hood to various vehicle systems. The main power rail is labeled "B+" at the top left. The following table summarizes the key components and their connections shown in the diagram:

Fuse / Component	Ampacity	Circuit / Destination
AUX POWER	20 A	Accessory Power Center - Console
CIGAR LIGHTER	20 A	Accessory Power Outlet - UP
RVC SNR	15 A	Body Control Module (BCM)
AFS	15 A	Headlamp Control Module
RR DEFOG	40 A	Rear Window Defogger Grid
Rear Window Defogger Relay	-	Control for RR DEFOG
HTD MIR	10 A	Mirror Heater
DS3	-	Driver's Side Mirror (OG)
DS3	-	Passenger's Side Mirror (OG)
V92	-	Trailer Connector
V92	-	Blunt Cut - Trailer Provision
TRLR BRK	30 A	Trailer Braking System
FSCM	25 A	Fuel Pump Flow Control Module

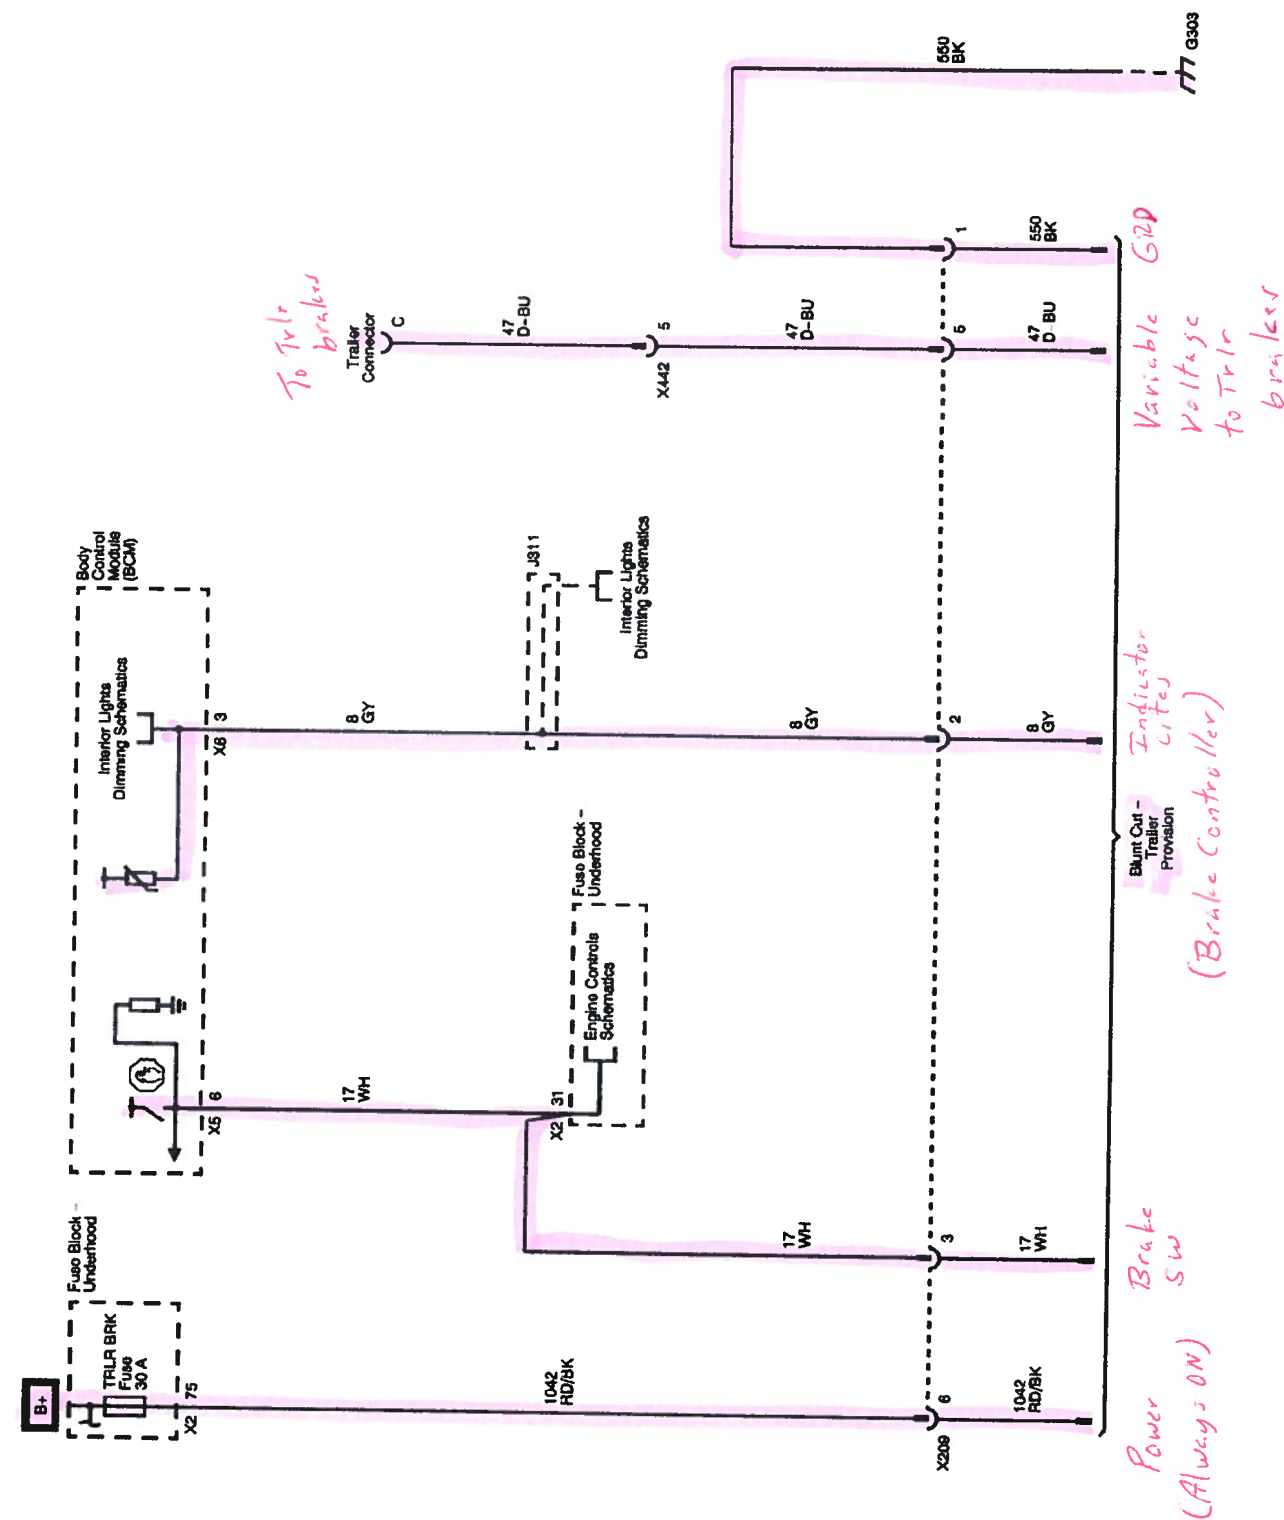

Handwritten notes include "Always ON" with arrows pointing to the trailer connector circuit and "Tchr" near the trailer provision.
